WINTEC

+ CONSIDER ULLTRACLAD FOR VERSATILITY & CREATIVE DESIGN OPTIONS ON YOUR NEXT PROJECT.

Wintec Systems offers a range of building products designed to exceed all relevant Australian standards. Be it weather or energy efficient door & windows with larger uninterrupted views, or low maintenance exterior cladding. Wintec Systems has the product.

Introducing: Ulltraclad - A powder coated Aluminium interlocking exterior cladding system that can be applied both horizontally and vertically.

It is suited to both residential & commercial building applications and is available in a wide range of colours in modern or classic designs.

Weatherboards are produced in a rusticated weatherboard profile, with either a smooth, corrugated or grooved face (Tee Board), a bevel back weatherboard profile (Traditional), or a flat face with negative joint detail (Shadoline).

They are produced in 6 different profiles which range in width from 140mm up to 205mm, and are supplied 5m and 6m lengths.

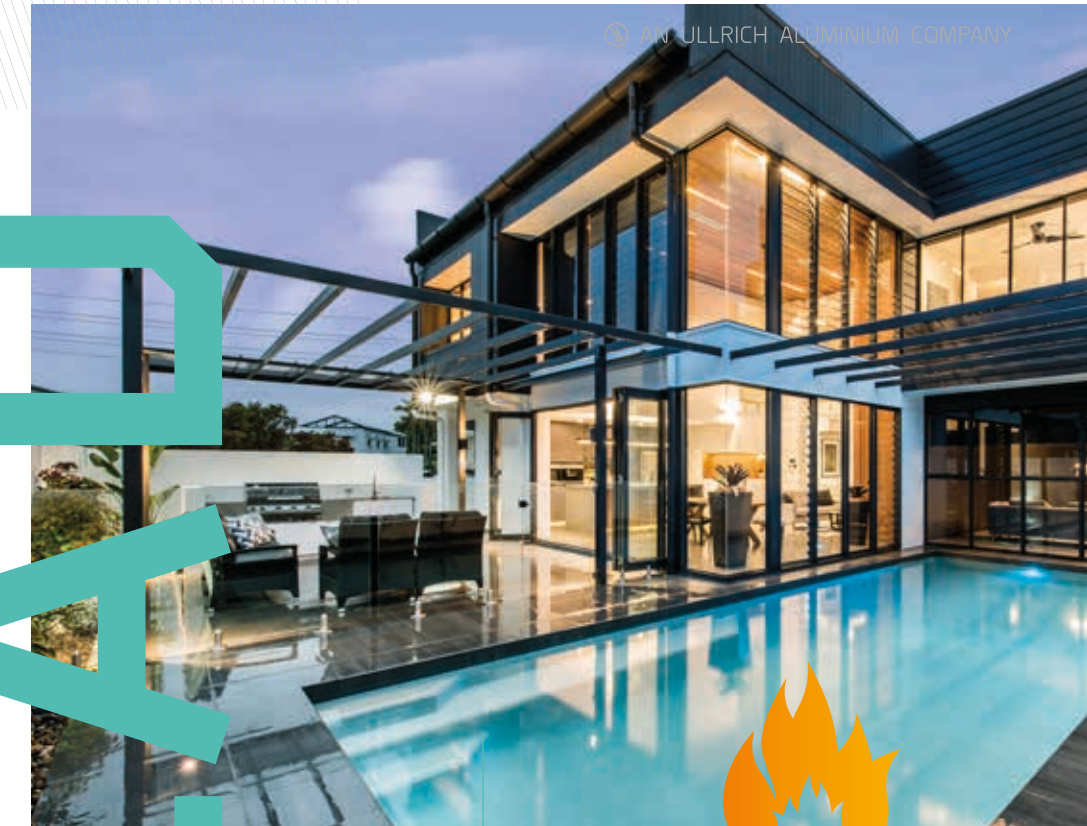

When installed, the cladding is effectively 15mm thick with the powder coat featuring on the exposed surfaces.

This system is applied to the external wall framing over an absorbent building wrap which has been extensively tested to cyclonic conditions.

TECH- NICAL INFO

ULLTRACLAD WEATHERBOARDS

TESTED TO WITHSTAND THE
HARSHEST OF AUSTRALIAN
CONDITIONS

MATERIAL & COMPLIANCE

Ulltraclad is extruded from 6060 T5 premium grade aluminium. It is tested to Australian cyclonic conditions and is backed by an extensive warranty.

APPLICATIONS

Ulltraclad caters for many design options from feature walls, gable ends to fully cladded buildings. The ease and speed with which Ulltraclad is installed and the fact that it is pre-finished, makes for faster construction time and reduced cost in scaffolding and painting.

COMPONENTS

Ulltraclad is supplied as a complete system which consists of weatherboards (Aluminium cladding), locator's for concealed fixing, internal / external corner moulds, starter strips, board jointer, window flashing and accessories.

PERFORMANCE

Ulltraclad has been designed to perform year after year, in Australia's harsh climate. Supplied throughout Australia, Wintec Systems has the sales and technical support to meet your cladding requirements.
